SUMMARY

BI & Analytics Developer with 2 years of experience delivering enterprise-grade Power BI and Oracle Analytics Cloud (OAC) solutions at Tech Mahindra for a large-scale healthcare client. Achieved a 92% reduction in report turnaround time (2 hours to 9.5 minutes) and managed 17+ production dashboards across 6 healthcare domains with zero post-launch escalations. Skilled in end-to-end BI development, including schema design, complex SQL, and DAX modeling, with strong stakeholder management experience. Proficient in Power BI, OAC, Tableau, SAP BusinessObjects, and AWS.

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX, Data Modeling, Power Query), Oracle Analytics Cloud (OAC), Tableau, SAP BusinessObjects, Advanced Microsoft Excel (Power Query, Pivot Tables)

Languages & Query: SQL (CTEs, Window Functions, Stored Procedures, Query Optimization), Python (Pandas, NumPy, Matplotlib, Plotly, Streamlit)

Data Engineering & Warehousing: ETL Pipelines, Star Schema Design, Dimensional Modeling, Data Transformation (DBT), AWS (S3, Glue, Athena, IAM)

Analytics & Business Skills: Exploratory Data Analysis (EDA), KPI Design, Variance Analysis, Forecasting, Customer Segmentation, Trend Analysis, Business Performance Reporting

Databases: Oracle SQL, MySQL, PostgreSQL, SQL Server

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

Associate Software Engineer (BI & Analytics Developer)

Sept 2023 – Present

Tech Mahindra

Pune, India

- **Project: Oracle Healthcare | July 2024 – Present**

- Achieved a 92% reduction in report turnaround time from 2 hours to 9.5 minutes by leading end-to-end Excel-to-Power BI migration, freeing up 1.8 analyst hours per reporting cycle across a 500+ user base.
- Owned 17 production dashboards in Oracle Analytics Cloud (OAC) spanning Surgery, Emergency, Pharmacy, Patient Registration, Orders, and Insurance; zero post-launch defects recorded across all 6 domains.
- Spearheaded full-stack migration from SAP BusinessObjects and Tableau to OAC, covering data mapping, schema redesign, UAT, and go-live; retired 3 legacy reporting systems for the client.
- Engineered complex SQL (CTEs, window functions, stored procedures, index tuning) on a high-volume Oracle database, cutting ad-hoc query response time by 38% and improving data validation coverage.
- Designed Star and Snowflake schema data models that cut dashboard load time by 43% and unlocked scalable reporting across 6 healthcare business units.
- Mentored 2 junior analysts in DAX authoring and data modeling best practices; enforced data governance and audit compliance across all BI deliverables, supporting 3 client audit cycles.

Skills: SQL, Power BI, SAP BusinessObjects, DAX, Tableau, OAC, Data Modeling, ETL, KPI Development

- **Project: Backend Data Engineering & API Development (Oracle DB & FastAPI) | Sept 2023 – July 2024**

- Engineered complex SQL queries, stored procedures, and data models in Oracle Database to support backend data processing and reporting pipelines; built RESTful APIs using FastAPI for a scalable learning management system, implementing end-to-end database schema design and data flow architecture.

PROJECTS

E-Commerce Revenue & Demand Intelligence System | [GitHub](#)

Dec 2025

- **Tools:** MySQL, Python (Pandas, SQLAlchemy), Power BI, DAX, Star Schema, ETL
- Designed a star schema data model in MySQL with optimized SQL analytical views for revenue, return risk, and CLV reporting across 7 product categories; built end-to-end ETL pipeline with data validation.
- Developed executive Power BI dashboards with DAX and time-intelligence functions tracking \$73M revenue and 100K orders; identified Fashion return rate (12.2%) as 2× company average, flagged as pricing risk.
- Performed **customer segmentation** via CLV analysis, revealing top **4% of customers generate disproportionate revenue**, enabling targeted retention strategy.

Hospitality Revenue & Performance Dashboard | [GitHub](#)

Nov 2025

- **Tools:** Power BI, DAX, Power Query
- Developed an interactive Power BI dashboard tracking **\$1.69B in hotel revenue** across 25 properties and 4 cities using key KPIs including RevPAR, ADR, Occupancy%, and Realisation%.
- Analyzed weekend vs weekday RevPAR gap (\$7,972 vs \$7,083) and evaluated performance across 7 booking channels to support data-driven pricing and channel optimization decisions.

EDUCATION

Bachelor of Engineering – Electronics & Telecommunications

2019 – 2023

Savitribai Phule Pune University

8.2 CGPA
