SUMMARY

Power BI Developer with hands-on experience in designing and maintaining interactive dashboards across Sales, HR, and Logistics domains. Skilled in Power BI, SQL, DAX, Power Query, and data modeling with expertise in building end-to-end reporting solutions, optimizing dashboard performance, and implementing secure data access using Row-Level Security (RLS). Experienced in developing KPI-driven analytics, transforming data from SQL and Snowflake sources, and collaborating with cross-functional teams to deliver actionable business insights.

TECHNICAL SKILLS

BI & Visualization : Power BI (Desktop & Service), DAX, Power Query, Data Modeling, Incremental Refresh, Deployment Pipelines, Paginated Reports, Advanced Microsoft Excel

DAX & Data Modeling : Measures, Calculated Columns, Time Intelligence, Row-Level Security (RLS), Star / Snowflake Schema, Composite Models

Databases & Querying : SQL, SQL Server, MySQL, PostgreSQL, Oracle SQL, CTEs, Window Functions, Stored Procedures, Query Optimization, M language

Data Analytics & ETL : ETL Pipelines, Data Cleaning, Data Transformation, KPI Reporting, Variance Analysis, Trend Analysis, Forecasting

Programming & Tools : Python (Pandas, NumPy), Git, GitHub, Jupyter Notebook, VS Code

Soft Skills : Communication, Data Storytelling, Stakeholder Management, Cross-functional Collaboration

EXPERIENCE

Tech Mahindra

Sept. 2023 – Present

Associate Software Engineer (Power BI Developer)

Pune, India

- Developed and maintained **13+ Power BI dashboards** across Sales, HR, and Logistics domains, delivering actionable insights to cross-functional stakeholders
- Built end-to-end data pipelines using **SQL and Power Query** to support analytics and reporting workflows, ensuring data accuracy from production to report layer
- Optimized dashboard performance by applying **query folding, DAX best practices, and dimensional modeling**, reducing report load time by **~25%**
- Implemented **Row-Level Security (RLS)** in Power BI to enforce role-based access control, ensuring users view only authorized data in compliance with data governance standards
- Developed **MoM, QoQ, and YoY KPIs** using DAX time-intelligence functions, enabling leadership to track performance trends and supporting a **20% improvement in decision-making efficiency**
- Designed and documented data models, schema relationships, and BI assets to maintain reporting consistency and support audit readiness
- Collaborated with data engineering teams to consolidate and transform data from production databases (**SQL, Snowflake**) into optimized reporting layers

PROJECTS

E-Commerce Revenue & Demand Intelligence System | MySQL, Python, Power BI, DAX,ETL

Dec. 2025

- Designed a star schema data model in MySQL with optimized SQL analytical views for revenue, return risk, and CLV reporting across 7 product categories; built end-to-end ETL pipeline with data validation
- Developed executive Power BI dashboards with DAX and time-intelligence functions tracking **\$73M revenue** and 100K orders; identified Fashion return rate (12.2%) as 2× company average, flagged as pricing risk
- Performed customer segmentation via CLV analysis, revealing **top 4% of customers generate disproportionate revenue**, enabling targeted retention strategy

Hospitality Revenue & Performance Dashboard | Power BI, DAX, Power Query

Nov. 2025

- Developed an interactive Power BI dashboard tracking **\$1.69B in hotel revenue** across 25 properties and 4 cities using key KPIs including RevPAR, ADR, Occupancy%, and Realisation%
- Analyzed weekend vs weekday RevPAR gap (\$7,972 vs \$7,083) and evaluated performance across 7 booking channels to support data-driven pricing and channel optimization decisions

EDUCATION

Savitribai Phule Pune University <i>Bachelor of Engineering – Electronics & Telecommunications</i> • CGPA: 8.2	2019 – 2023 Pune, India
